Linkedin: www.linkedin.com/in/monica-florent | Portofolio: <https://monicaflorent.github.io/>

I'm an Informatics graduate with a strong interest and hands-on skills in **UI/UX Design**.

I specialize in crafting intuitive, user-centered interfaces and building functional, responsive websites. I'm driven by creativity and analytical thinking, and passionate about collaborating with cross-functional teams to deliver impactful and user-focused digital solutions.

PROJECT EXPERIENCE

Moreen – Beginner Mountain Hiking Guide App

Full-Stack Developer

- Designed and developed a web and mobile application named Moreen, aimed at providing comprehensive guidance for beginner mountain hikers in Indonesia.
- Integrated key features such as digital hiking ticket booking, equipment checklists, emergency procedures, survival tips, and route recommendations to ensure safety and preparedness.
- Built using Flutter for mobile and Laravel for the admin web panel, with a user-friendly interface tailored for novice hikers.
- Led UI/UX research and conducted usability testing to enhance the user experience for first-time adventurers.
- Successfully deployed the system for simulation use and received positive feedback from 10+ test users for its clarity and helpfulness.

EDUCATION BACKGROUND

University of Technology Yogyakarta

2021 - 2025
